

SCE 4310

Class Activity Reflection Paper (25 points each)

This assignment requires you to do a thorough reflection on each of the class presentation in our class. You must write your paper along the following categories:

1. What major science concepts did you learn from the presentation?
2. How did this presentation align with the recommended Science Teaching standards within the National Science Education Standards (Chapter 3)?
3. What area(s) would you do differently to ensure this presentation that is congruent with the National Science Education Teaching Standards?

You need to have a minimum of **300** words of each reflection. You need to write your reflection for five (5) out of all presentations. This assignment must be **typed**. You are encouraged to use different writing styles for each of your reflection paper.

Due Date: You have to turn in your reflection paper **one week** after each presentation.
